

# Do Exploratory Testers Need Formal Training?

An investigation using HCI techniques

**Authors:** Mark Micallef • Chris Porter • Andrea Borg

**Speaker:** Christian Colombo

**University of Malta**

# Ongoing Debate: Do Exploratory Testers Need Formal Training?

# Hypothesis

- “(Un)trained exploratory testers intuitively use different – yet complementary – exploratory testing strategies”

# Research Questions

- **RQ1:** Which types of exploratory testing strategies are utilized by (un)trained testers?

# Research Questions

- **RQ1:** Which types of exploratory testing strategies are utilized by (un)trained testers?
- **RQ2:** Which types of bugs are found by testers in each group?

# Research Questions

- **RQ1:** Which types of exploratory testing strategies are utilized by (un)trained testers? (S – T)
- **RQ2:** Which types of bugs are found by testers in each group? (B – T)
- **RQ3:** Is there a link between the bugs found and the testing strategies adopted? (B – S)

# Research Questions

- **RQ1:** Which types of exploratory testing strategies are utilized by (un)trained testers? (S – T)
- **RQ2:** Which types of bugs are found by testers in each group? (B – T)
- **RQ3:** Is there a link between the bugs found and the testing strategies adopted? (B – S)
- **Bonus:** How should we compose testing teams?

# Research Questions

- **RQ1:** Which types of exploratory testing strategies are utilized by (un)trained testers? (S – T)
- **RQ2:** Which types of bugs are found by testers in each group? (B – T)
- **RQ3:** Is there a link between the strategies adopted? (B – S)
- **Bonus:** How should we compose

How do we identify what strategy is being used by a tester?

# How do we Identify Strategy used?

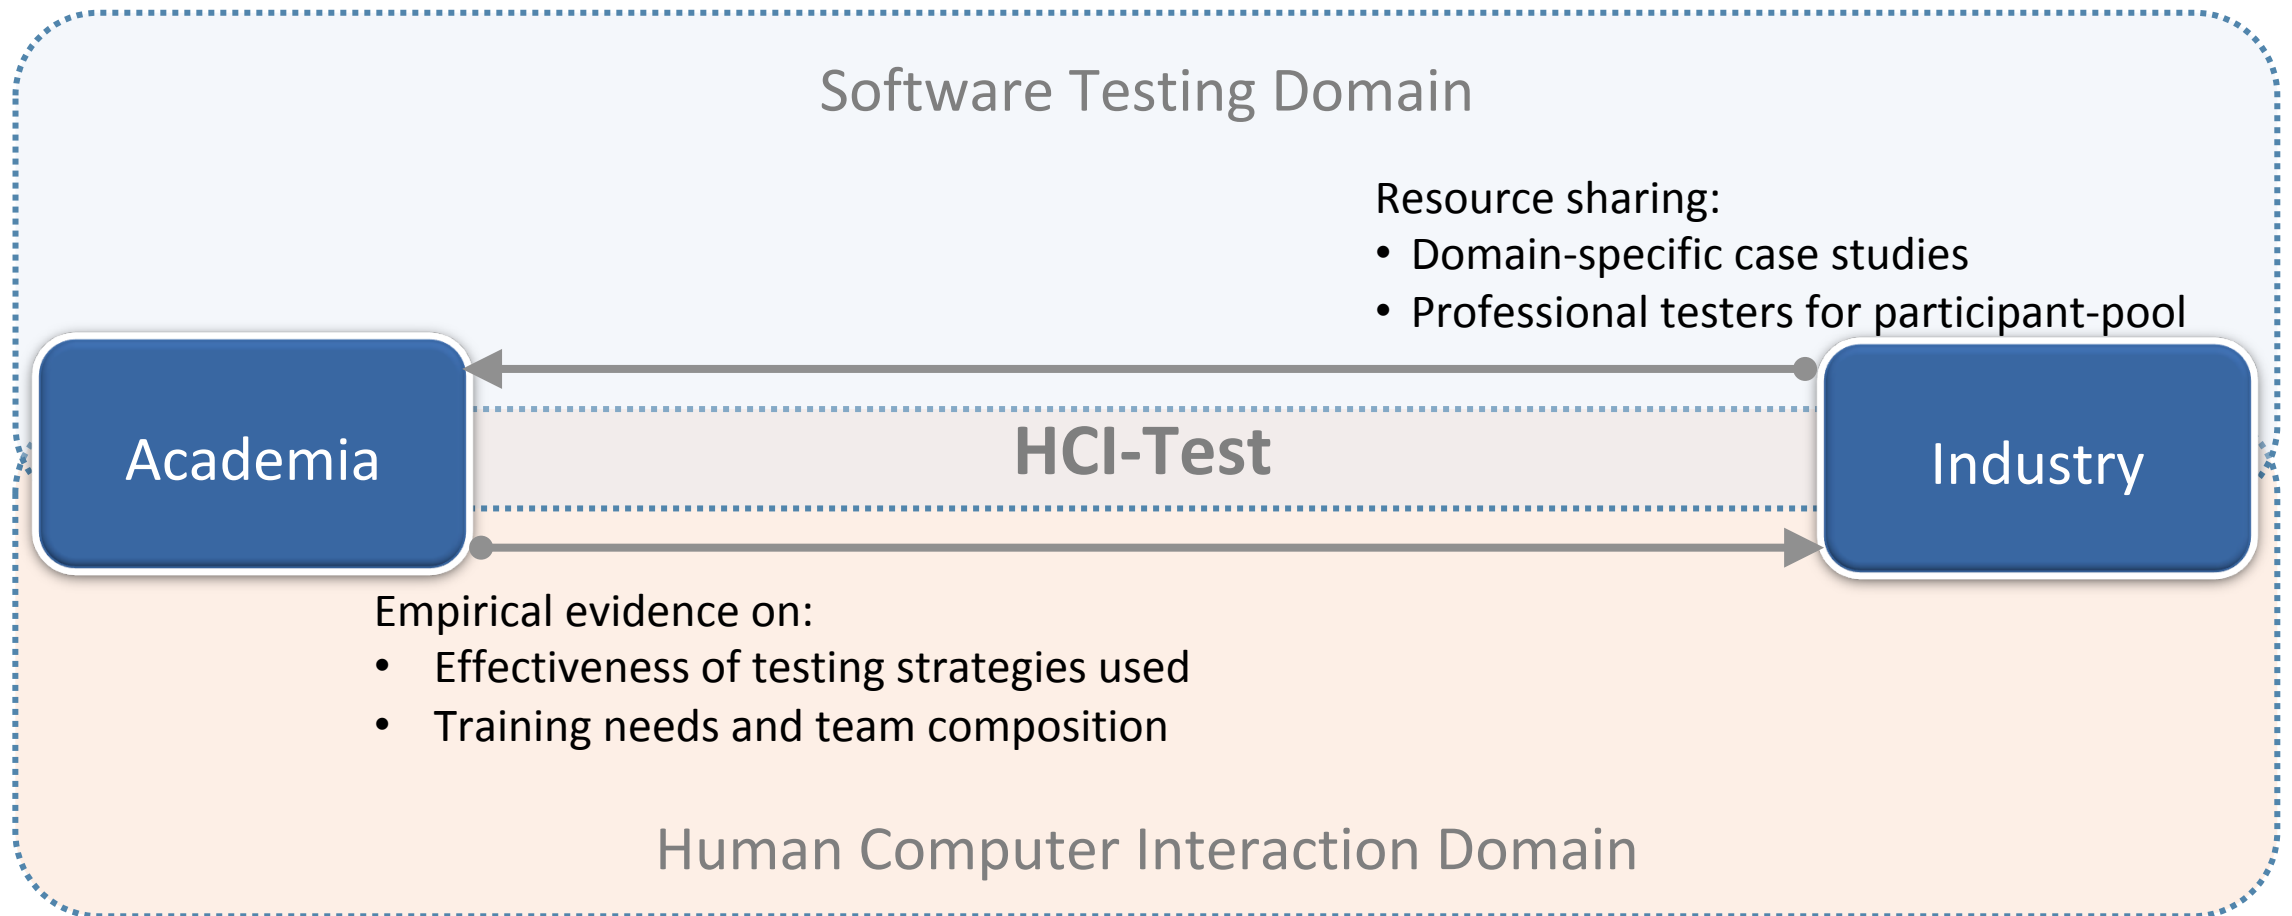

Software Testing Domain

## HCI-Test

- Reflective think aloud
- Semi-structured interview
- Eye tracking

Human Computer Interaction Domain

# Industry-Academia Collaboration

# Experiment Setup: An E-Commerce System

○ 20 bugs

Bug Category	Example	#
Content	Spelling mistakes	6
Input validation	Text in numerical field	3
Logical	Incorrect calculations	3
Functional UI	Broken links	6
Non-functional UI	Issues when resizing view	2

# Experiment Setup: An E-Commerce System

- 20 bugs
- 20 participants: 10 trained/10 untrained

# Experiment Setup: An E-Commerce System

- 20 bugs
- 20 participants: 10 trained/10 untrained

# Bonus Insights – Team Composition

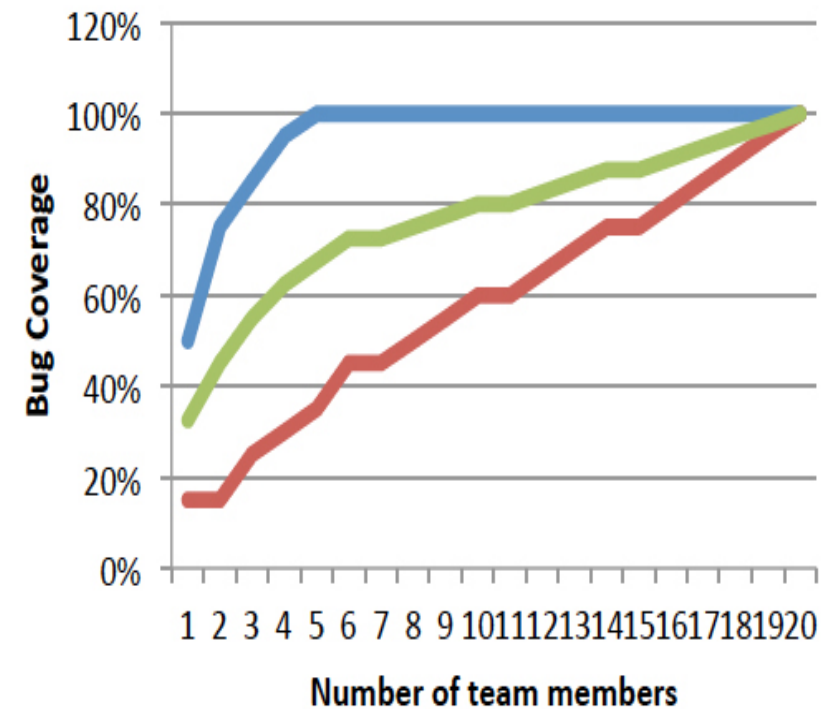

## Untrained Only

## Trained Only

## Untrained + Trained

# Takeaways

- A **methodology** to gather empirical data on exploratory tester's behaviour
- Insights guide **team-composition** and **training** related decisions
  - Trained testers use more guided strategies
  - Trained testers find more bugs
  - Trained testers didn't find all bugs
- Outcomes encourage **further collaboration** between academia (HCI/SE) and the testing community, helping to evolve processes and techniques in both domains
